VISION OF NEHEMIAH

The Providential Agent Mr. Nehemiah TCHAKUBUTA BYAOMBE born on 02-08-1982 in Fizi-Centre, son of SENG A BYAOMBE and ECA YOHALI, was first called by God and subsequently explored the entire invisible spiritual world, which is the world of the cause, seeking to resolve all the fundamental questions of life and the universe. He had to overcome immense obstacles in the spiritual world. In his search for the truth, he had to follow a path of suffering and engage in a violent battle against the forces of darkness. Only God truly knows the path he had to take. He communicated freely with Jesus and his disciples.

Nehemiah TCHAKUBUTA BYAOMBE received a revelation concerning the fundamental aspects of God's will relating to the life of man. In order to develop a system and teach it, he spent countless hours in prayer and Bible study. In 2018 (period of divine inspiration), he began to officially teach the most important parts of the new revelation "Theocratic Numerology" which is a wisdom that clearly and convincingly proves the power of God to save the world and humanity, this wisdom has not yet been published and will only be published depending on the progress of providence and the realization of the foundation established on earth.

At each stage of history God has had to work with man according to his spiritual state and his intellectual level. As spiritual and intellectual levels progressed through the ages, God had to discover ways to educate and relate to men. For example, in the time of Abraham, when man's spirituality and intellect were extremely low, God had to resort to sacrifices to bring men closer to Him. The men of that time lacked too much maturity to respond to the laws and commandments. Several centuries later, in the time of Moses, God accomplished providence through the Law. In Jesus' time, instead of repeating the same providence through laws or commandments, God worked differently to bring men closer to Him, giving the Gospel at a level corresponding to the spirituality of men of that time. . The fact that the Jews who devotedly believed in God did not recognize his Son Jesus as Savior is a crucial point in the providence of restoration. At that time, the Israelites followed God by obeying the Law, but God then tried to draw closer to men through Jesus himself by means of the new providence of the Gospel. In light of these historical facts, we see that as man's spirituality and intellect develop, God continues to adopt a method capable of reaching man. The objects of the living God and his providence are not fixed beings but people full of life and dynamism.

As we have seen in the historical process of God's restoration, God is alive and active, so we know that God ultimately gives man a new expression of truth, a truth that will lead men in our day towards salvation and towards a new era. But since this will be a new revelation (wisdom), some aspects may not be understood in terms of conventional doctrine or tradition. There is another reason that humanity needs a new expression. We are entering a new age. We live in a time of rapid transition; Yet, with all the changes taking place at the individual and family levels, in society, in nations and in the world, many people are concerned about the direction these changes are taking and that a fundamental transformation is necessary.

" Theocratic Numerology" which is a wisdom capable of guiding and offering hope to those who wish to discover the essence of existence and desire to lead a life of integrity and dignity.

Theocratic Numerology constitutes the teaching revealed by God to his Servant Nehemiah TCHAKUBUTA BYAOMBE, the latter never made theological or philosophical studies, God chose him to express his will.
